Vitaking

is a hungarian company focused on developing and distributing nutritional supplements and other health related products both domestically and internationally. Our dynamic expansion lies on the recommendations of our loyal, satisfied customers and also on our distributors. Our mission is to provide a better quality of life by our natural products to our customers. Each and every product contains high concentration of active ingredients.

The production is in accordance with the strict regulation by the European Union. Our company being presented in this catalogue, has a wide range of products with vitamins, minerals, herbs and other dietary supplements, for all ages from children to the elders.

During the production of our products, we are constantly working to ensure the best possible quality. That is why we can proudly say that in addition to HACCP, we now also have GMP and FSSC 22000 certificates too.

In 2020 and 2019, Vitaking Kft. received recognition in the category of Excellent Business Brand and Innovative Brand based on the decision of the Professional Committee of Hungarian Brands.

In 2016, Vitaking Kft. Received the Business Ethics Award. "A company that is consciously built, honest, gives a lot to quality and reliability, and works hard to advance its narrower environment. Beyond the size of a small business, it adds a lot to ethical, responsible operations. " (This is how the founders and members of the jury commented on how Vitaking works.)

In 2020, Vitaking Kft. Received the gold grade of the Bisnode AAA (triple A) certificate, for the fifth year in a row. Our company is thus the most internationally recognized, reliable, creditworthy and financially stable company. In Hungary, only 0.63% of companies have such a certificate.

Vitaking Kft. Has been a stable supporter of the Campaign for a Drug-Free World in Hungary for more than a decade, and main supporter in the recent years. We consider it important to properly educate the next generation and educate them on a health-conscious lifestyle.

VITAMINS

Vitamins are organic compounds that support the body's biochemical processes. Each has a unique chemical structure and has their specific function in our body. Our body is unable to synthesize most of the vitamins in an adequate amount or in any amount, so we need to make sure we consume it with our daily nutrient, or with the right supplements.

MULTIVITAMINS

According to the theory of the weakest link, no matter how strong is the chain, it will break at the weakest eye. For example, magnesium is not just contributes to normal muscle function but has a role in maintaining normal bone structure. In the absence of vitamin D, Magnesium can not properly utilized in our organization. Vitamins and Minerals work together in a system well, therefore it is worth to consume them in a complex form.

VALUE AND QUALITY AWARD

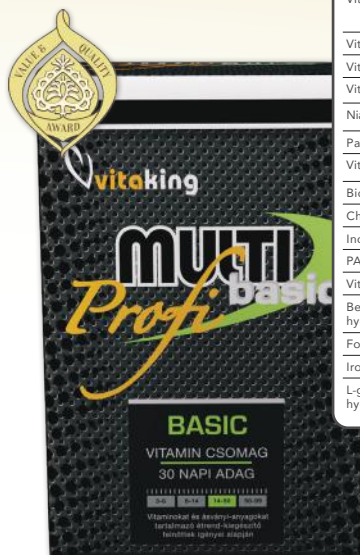

Our Multi Profi product family won the Hungarian Product Grand Prix in 2017, which is an objective rating system and every year since 2018 Multi Profi products have been awarded the Value and Quality Grand Prix the trademark of high-quality goods and services.

THE MISSION OF THE VALUE AND QUALITY AWARD

This is an award for the recognition and reward of products, services, and business organizations that are demonstrably committed to quality in their operations and attach great importance to the production of high quality products and the provision of high quality services.

This is a success that we could not achieve without our partners and our customers. Each of our customers and partners has contributed to making these products so popular and successful. Today we can say that this is one of the most popular multivitamin family in Hungary, and it is a huge thing for us.

OTHER NUTRIENTS

Every person's body has different needs. There are nutrients that are not classified as vitamins even though they are very helpful. It is important to choose supplements according to our lifestyle, eating habits, possible illnesses and our environment.

General multivitamin supplements are essential but if our lifestyle requires it is advised to supplement our diet with other nutrients as well.
