2. EU certifications
3. Authorized products
4. Fast delivery
5. Premium quality
6. Controlled stocks
7. Quality guaranteed
8. Professional assistance
9. Competitive prices

01 high standards

Competitive prices with reliable standards...

We offer you wide range of products, of excellent quality.

Our products are conform to EU standards. At present our products are registered for commercial use in ten countries.

The opportunity to purchase products with a label in your own language could be a subject of discussion.

Last but not least it is our main goal to provide our customers with supplements containing a high concentration of active ingredients at accessible prices in order to achieve optimal health!

It's the quality that makes the difference

It's not difficult to offer cheap products when you are using a poor concentration of active ingredients and low-class packaging.

But for what purpose? There will be no results and no customers.

the experience of health

is possible with us!

- One of the best things we experience in the course of our work is hearing customers say that we have helped them.
- Mothers telling us their children weren't getting ill.
- Sportsmen who said their physical condition had improved and who weren't suffering from cramps or muscle strains anymore.
- Expectant mothers confirming that their pregnancies had been uncomplicated and happy with no iron deficiency.
- Elderly costumers reporting they had succeeded in getting back their physical fitness.
- People who want to be healthy while saving money telling us our prices were really good.
- People on a diet who had success in losing weight with the help of our products.

02

Innovative people and processes

Our intention is to help people achieve and maintain good health by means of the latest technology and well-trained staff.

03

innovative ideas

Continuous development

- Expansion cannot be put on hold but neither would we want to do so.
- We orient ourselves according to research findings and take our costumers opinions and suggestions into account.
- In the interest of a faster work pace we are constantly developing our machinery in order to reach a wide range of customers even more rapidly.
- Meanwhile, we are already building our next major development, which is our own tablet press and capsuling production line.
- We pay close attention to keeping track of the stated active ingredient content of the tablets and capsules.

We are proud of our achievements

In the last few years, our brand has gained a good reputation for itself on the market and our products can be found in many European countries already. We are proud of the abundance of positive consumer feedback.

our certificates and awards

- During the production of our products, we are constantly working to ensure the best possible quality. That is why we can proudly say that in addition to HACCP, we now also have GMP certificate too.
- The Value and Quality Grand Award is a prestigious title for the recognition and rewarding of goods, services and economic organizations that have a demonstrable commitment to the quality of their activities and pay great attention to the production of high quality products.
- The MagyarBrands program only evaluates Hungarian brands that were established in Hungary. Based on the decision of the Professional Committee, Vitaking Kft. is an EXCELLENT BRAND. We also received recognition in the Excellent Business Brand and Innovative Brand categories.
- In the Bisnode International company rating system we earned the Gold AAA rating. On the Hungarian market only 0.63% of the companies have received this title which represents an excellent financial standing.

Our most important mission

Our goal is to help others with our products and services to create a better quality of life in our society and we are constantly looking for distributors who can identify with our mission and want an effective way to help people.

05

social responsibility

- We consider it important to support organizations, associations and athletes who represent a healthy lifestyle in Hungary.
- For more than ten years, we have been supporting the team of the Drug-Free Hungary Movement, an association of dedicated volunteers who are fighting to reduce drug use in Hungary.
- We help the development of several athletes in Hungary with a monthly supply of vitamins, including European and world champions, Olympians and various sports associations. We are proud to be able to contribute to their success in sports.
- We have introduced alternative and renewable energy sources at our site in order to protect the environment. With these, we have halved the emissions of heating by-products.
- We have installed a rainwater collection system, so we can solve the irrigation of our properties a 90% natural way, thus reducing the use of drinking water and saving the valuable water resources of Hungary.

Customer testimonials

"I'm really satisfied with the product, I give it to my children and I use them too. I'm more energetic and feeling better; my children haven't missed a day of nursery in the recent year. Thank you!"

Schroti about Children's Chewable multivitamin

"A vitamin of excellent quality. My wife has been taking Multi Plus and D3/2000. Thank you very much Vitaking, I've never in my life received so many discounts from other websites or stores, not even if I spent large amounts. The other Hungarian enterprises should be following your example! I can wholeheartedly recommend Vitaking because there is no easier way to get the vitamins. Thank you again, I wish you all good health and happiness!"

Viktor about our brand

"It is a really authentic product. I have problems with sleeping but since I have been taking these capsules, I'm fine with 4 hours of sleep. Even after working out four times a week my body is able to regenerate much faster."

Lippaia about Liquid Multi Plus

"We're really satisfied with the product. I ordered it for my mother, she had been suffering from acute anemia for 8 years. Every 3-4 weeks she had been having to get 4 units of blood. After having taken the first package she started mending and now in the second month of taking the supplements she doesn't need to get blood transfusions anymore. Why aren't the doctors recommending all these vitamins? The next package is already on its way. Thank you Vitaking!"
